

stage rider for suntone looping

i play with an acoustic guitar , a loopstation and some pedals.

i need a little (or big ) pa system with a mixing console with 2 inputs .

i need also a microphone plus a microphone stand .

and thats it !

no monitoring needed , i use in ear monitoring.

setting up my equipment needs about 10 minutes , rebuilding also around 10 minutes.

i need to make a short soundcheck though.

easy , fast , convenient ...
